

# DON'T VISIT MEDICAL FACILITIES UNNECESSARILY

PLATINUM  
HEALTH

Medical facilities world wide pose a health risk as there are other patients with various medical conditions that can be infectious.

Platinum Health is taking great precaution to reduce the risk of contracting COVID-19 at our medical facilities. However; sick patients are visiting facilities and these can include COVID-19 positive patients.

In spite of all the preparations we've done and our numerous requests for members not to visit our facilities unnecessarily; we still see numbers of patients visiting facilities with minor ailments. Many patients are being accompanied by family members which unnecessarily increases the risk of the spread of infections.

The risk of visiting any health institution is very high and patients are urged to only visit if necessary.

*We urge members to stay away  
if possible .....  
because we care*
