

WORLD HEALTH DAY

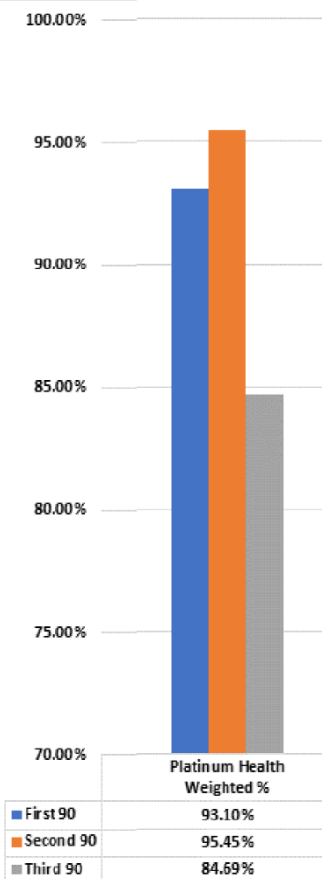

PLATINUM HEALTH

In our continued support of a fairer, healthier world in 2021 and despite COVID-19 challenges, Platinum Health has maintained its core principles:

Access to health: We continue to operate close to where our members reside or work, and if not feasible to operate, Designated Service Providers are contracted to render services where members reside.

Equity: Our income-based contribution structure ensures members, including their families, are comprehensively covered, by offering affordable contributions. Platinum Health continues to offer superior benefits to members, unmatched in the industry, always based on affordability and improved access to health services.

90-90-90

Quality: Left and below graphs bear testimony to quality healthcare and improving healthcare to our members. We have reduced the TB incidence to half of the national rate where we operate. We are also on target to achieve the WHO 90-90-90 targets by year 2021 at all our sites and we are aligning ourselves to the new set targets for 2025.

TB Cases
